

# Mug Press

## Cricut Mug Press

Create stunning and professional quality mugs using the infusible ink markers or bring your own infusible ink sheets. Your finished project will be dishwasher safe!

 [Learn More](#)

### DESIGN & CUT

Using the Cricut Design Space App, design a mug using the templates or select a pre-designed mug. Use a sublimation coated mug.

### WRAP IT UP

Wrap your design tightly around the mug with the design facing in. Carefully make sure there are no bubbles or wrinkles. Use the heat-resistant tape to seal the design around the mug.

### HEAT PRESS & COOL DOWN

Carefully place your mug in the press and press down on the lever. The press will beep when finished. Hold your mug by the handle and leave on a heat-resistant surface to cool completely before removing wrap.

## Cricut Mug Press

Create stunning and professional quality mugs using the infusible ink markers or bring your own infusible ink sheets. Your finished project will be dishwasher safe!

- 1** Ensure that you are using a Cricut brand mug, or a mug that is labelled acceptable for "Sublimation". Mugs will have to have a sublimation coating in order to accept the heat transfer.
- 2** Using the Cricut design space app, draw out a design using the infusible ink markers. Or cut out a design on an infusible ink sheet.
- 3** Handle the surface of the mug as little as possible to avoid transferring oils from your hands. Lint roll or wipe with an alcohol cloth to remove debris or oils.
- 4** Carefully wrap your design around the mug with the design facing in.
- 5** Wrap at least two layers of copy paper or butcher paper around the design of the mug. Cut this paper close to the top and bottom of the mug to avoid unnecessary burning or scorching.
- 6** Wrap the mug in heat resistant tape. Seal anywhere that gasses might escape from your design.
- 7** Place the mug inside the machine and press the lever down completely. Ensure that the heat plate covers the design. The machine will beep when your design is finished heating.
- 8** It is very important to not touch your design. Handle the mug only by the handle and leave the wrapping on until the mug has cooled completely. This will prevent smudging.
