

Smart Cutting Machine

Cricut Maker

Cut, score, deboss, and engrave with the Cricut Maker. Make your own greeting card, custom decal, or t-shirt design.

 [Learn More](#)

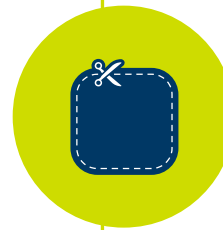

START HERE

Use the Cricut Design Space app to create your own design. You can also use or customize a ready-made design from Design Space.

CUT IT OUT

Send your design to the Cricut for cutting - or scoring, engraving, or embossing depending on your design.

ASSEMBLE

Time to put it together! Assemble your greeting card, apply your decal, or iron-on your design.

Smart Cutting Machine

Cricut Maker

Cut, score, deboss, and engrave with the Cricut Maker.
Make your own greeting card, custom decal, or t-shirt design.

- 1 Use the Cricut app, Design Space to get started. The Cricut App allows you to design your own project, or choose from one of many pre-loaded, ready to make projects.
- 2 Click “Make It”. The program will automatically break down your design, cutting one colour at a time
- 3 Position your material for the first colour. The program will guide you and tell you what to load.
- 4 Click “Continue”
- 5 The program will prompt you to select what material you are using and will prompt you to load any applicable tools.
- 6 Load the mat into the machine by clicking the flashing “Load/Unload” button.
- 7 Press the flashing “Cricut” button when ready
- 8 Repeat as needed for each colour. Watch your screen, as it will guide you!
