

Tumbler Press

BetterSub Tumbler Heat Press Machine

Design and make your own tumbler with the tumbler heat press!

- 1 Place your image on the tumbler's surface, top-up, face-in and secure it with high-temperature tape
- 2 Turn on the machine and adjust the temperature to 400F.
- 3 Set the timer for at least 120 seconds.
- 4 When the heat press is preheated, the machine will beep.
- 5 Now you can insert the tumbler into the heat press. Close the press by firmly closing the handles.
- 6 Press 'Start'.
- 7 Once the heat press is finished, the machine will beep, and then the tumbler can be carefully removed using heat-resistant gloves.
- 8 When the tumbler has cooled, you can remove your paper and tape and unveil your new work of art.
